Sept 28th 2011

**The 2011 LSA tour continues.
*Dallas Ft Worth set for an LSA invasion October 14-16***

Addison, Denton & Dallas Executive airports in the Dallas Ft Worth area are hosting the 2011 Dallas Ft Worth LSA tour. Aircraft will be on display and demonstration flights available at each of the locations. Bill Canino of Sportair USA, one of the participants said "Not everyone interested in purchasing a plane can attend one of the larger shows each year. The LSA Tours have been a great way to showcase these aircraft to a much more localized and interested audience". "This is the ideal format for people to check out the top ten LSA's without the pressure or hassle of a national show" said Randy Schlitter of Rans Aircraft. "In fact, it's probably the best format to see all the main LSA players, and demo each model" he added.

Texas is the third largest aviation state in the nation. No national event caters for this large audience of aviators. The Dallas Fort Worth area has the highest concentration of aviators in Texas. Within the 30 nm Mode C veil surrounding DFW are more than 50 airports, airparks and private airfields. Also, one of the largest LSA fleet operators in the country, US Aviation Group is based close by in Denton, just north of DFW.

The Tour, running October 14th through 16th is visiting three airports in the Dallas Ft. Worth area. These are:

Oct 14 th	KADS (Addison) Host Contact	2:00 pm to 7:30 pm US Sport Aircraft, Patrick Arnzen, (859 496 5777)
Oct 15 th	KDTO (Denton) Host Contact	8:00 am to 4:00 pm US Aviation Group, Maggie Severen (940) 297-6411)
Oct 16 th	KRBD (Dallas Exec) Host Contact	8:00 am to 4:00 pm City of Dallas, Dallas City Hall. Dallas Exec Airport (214-670-7612)

"Sport pilot and Light Sport Aircraft is the new and exciting way to get involved in flying with less time and expense" according to Patrick Arnzen of US Sport Aircraft, one of the tour hosts. "The LSA tour helps to introduce people to the Light Sport Aircraft revolution" he added. "Owning a Light Sport Aircraft is easy, affordable, safe and fun" said Scott Severen of US Aviation Group. "People who have dreamed of learning to fly, or have wanted to own an affordable & fuel efficient aircraft should come and visit the event and see the aircraft on display" he added. According to Remos's Sue Parker. "The Dallas Ft. Worth LSA tour is an excellent way to see what's available, speak with flight instructors, maintenance personnel and manufacturers all at the one easy location".

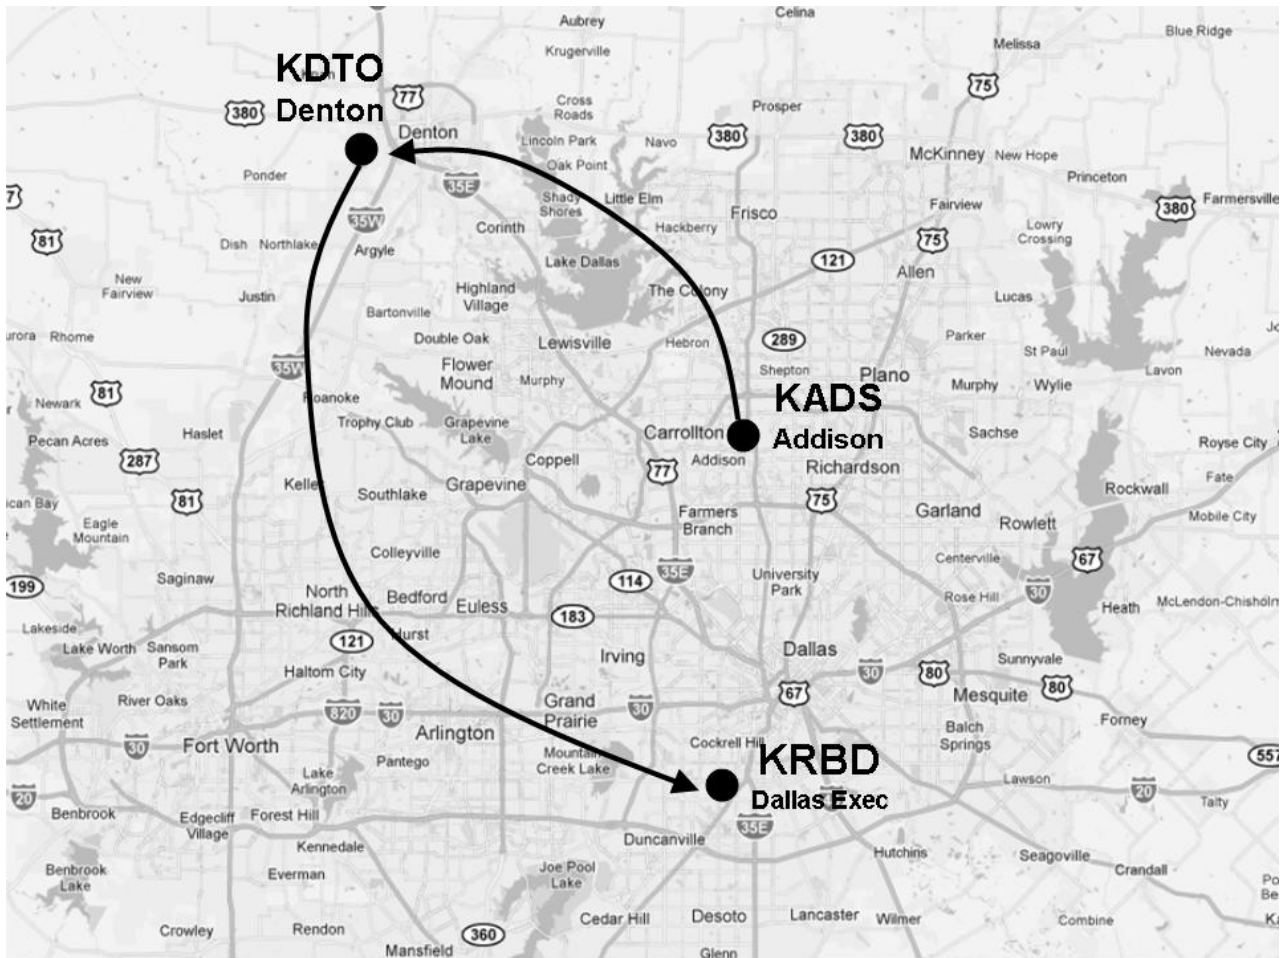

At each event the LSA Tour is hosted by an organization. The organizers are very grateful to US Sport Aircraft, US Aviation group and the City of Dallas who are the hosts for the Dallas Ft Worth Tour. Refreshments will be available at each location. US Aviation Group is holding a pancake breakfast to coincide with the Denton stop.

Confirmed participants are:

Arion Aircraft	www.flylightning.net
Cubcrafters	www.cubcrafters.com
Czech Sport Aircraft	www.czechsportaircraft.com/
Evektor	www.evektoraircraft.com
Flight Design	www.flightdesign.com
iCub	www.iCub.aero
Jabiru USA	www.usjabiru.com
Legend Aircraft	www.legend.aero
Rans Aircraft	www.rans.com
Remos	www.remos.com
Sting LSA	www.sting.aero
Sirius LSA	www.sirius.aero
Sportair USA	www.sportair.aero
Tecnam	www.tecnam.net

These represent best-selling Light-Sport Aircraft in America. When gathered in one group at popular airports, these displays make it very easy for interested aviators to see the best of the breed.
